

Assurance Continuity Maintenance Report

BSI-CC-PP-0056-V2-2012-MA-02

Common Criteria Protection Profile Machine Readable Travel Document with "ICAO Application", Extended Access Control with PACE (EAC PP), Version 1.3.2

from

Bundesamt für Sicherheit in der Informationstechnik

The Protection Profile identified in this report was assessed according to the *Assurance Continuity: CCRA Requirements*, version 1.0, February 2004 and the developers Impact Analysis Report (IAR). The baseline for this assessment was the Certification Report and the Evaluation Technical Report of the Protection Profile certified by the Federal Office for Information Security (BSI) under BSI-CC-PP-0056-V2-2012.

The change to Protection Profile is at the level of an editorial clarification. The change has no effect on assurance. The identification of the maintained Protection Profile is indicated by a new version number compared to the certified Protection Profile.

Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path to continuity of assurance.

Therefore, the assurance statement as outlined in the Certification Report BSI-CC-PP-0056-V2-2012 dated 10 February 2012 is maintained for this version of the Protection Profile. Details can be found on the following pages.

This report is an addendum to the Certification Report BSI-CC-PP-0056-V2-2012.

Bonn, 21 December 2012

Assessment

The Protection Profile in this report was assessed according to the *Assurance Continuity: CCRA Requirements* [1] and the Impact Analysis Report (IAR) [2]. The baseline for this assessment was the Certification Report of the Protection Profile [3] the Protection Profile and the Evaluation Technical Report as outlined in [3].

The sponsor for the Common Criteria Protection Profile Machine Readable Travel Document with "ICAO Application", Extended Access Control with PACE (EAC PP), Version 1.3.2, BSI, submitted an IAR [2] to the BSI for approval. The IAR is intended to satisfy the requirements outlined in the document *Assurance Continuity: CCRA Requirements* [1]. In accordance with those requirements, the IAR describes (i) the changes made to the certified Protection Profile and (ii) the security impact of the changes.

The Common Criteria Protection Profile Machine Readable Travel Document with "ICAO Application", Extended Access Control with PACE (EAC PP), Version 1.3.2 was changed due to some wording in the refinement of FMT_MTD.3.1 to clarify that the hitherto used interpretation of this refinement is correct. Configuration Management procedures required a change in the Protection Profile identifier. Therefore the version number changed from version 1.3.1 to version 1.3.2.

Conclusion

The change to the TOE is at the level of an editorial clarification in the Protection Profile. The change has no effect on assurance.

Consideration of the nature of the change leads to the conclusion that it is classified as a minor change and that certificate maintenance is the correct path to continuity of assurance.

Therefore, BSI agrees that the assurance as outlined in the Certification Report [3] is maintained for this version of the Prootection Profile.

This report is an addendum to the Certification Report [3].
